

HANIN NEZAR AYYASH

Front-End Developer | React.js & Modern Web Technologies

Lattakia, Syria | +963 981 324 572 | haninayash997@gmail.com | github.com/ayyashf | ayyashf.github.io/hanin-portfolio

PROFESSIONAL SUMMARY

Front-End Developer and Software Engineering graduate with hands-on experience building responsive, modern web applications using React, Vite, and JavaScript. Skilled in developing clean, reusable, and user-friendly interfaces and integrating front-end applications with REST APIs and authentication systems. Experienced in working collaboratively within a team to develop and deliver web applications while following modern development practices. Proficient in Tailwind CSS, Bootstrap, Framer Motion, and responsive web design. Completed an intensive 72-hour front-end training program with a 91.6% final score. Strong problem-solving skills, fast learner, and effective team collaborator.

TECHNICAL SKILLS

- Languages & Core: JavaScript (ES6+), HTML5, CSS3
- Frameworks & Libraries: React.js, Vite, React Router, Framer Motion
- Styling & UI: Tailwind CSS, Bootstrap, Responsive Design
- Backend Integration: REST API Integration, JWT Authentication, CRUD Operations
- Tools & Practices: Git, GitHub, Team Collaboration

PROFESSIONAL TRAINING

Front-End Developer Trainee | VICA Company 2024

72-hour intensive program · Final Score: 91.6%

- Built interactive, responsive web applications using HTML, CSS, JavaScript, and React under mentor supervision
- Applied responsive design principles and REST API integration to deliver functional, modern front-end workflows

PROJECTS

NFT Marketplace | Graduation Project 2025 - 2026

React.js · Vite · TON Blockchain · JWT Auth

- Built the complete front-end of a full-stack Web3 NFT marketplace, integrating TON blockchain wallet connectivity for buyers and sellers
- Developed Login, Register, Profile, Marketplace, and Discover NFT pages from scratch, delivering a cohesive end-to-end user experience
- Implemented JWT authentication, React notification library, and responsive UI components to improve usability and user feedback

AdminPro - Admin Dashboard | Personal Project 2025

React.js · Tailwind CSS · JWT Auth

- Built an authenticated admin dashboard with product management, full CRUD operations, and dark mode support

E-Commerce Store | Personal Project 2025

React.js · REST API · Tailwind CSS

- Built and deployed (GitHub Pages) a shopping app with cart, favorites, search, and full REST API integration

UniTrack | Semester Project 2024 - 2025

React.js · React Router

- Designed an academic project-management platform for students and supervisors to track progress collaboratively

EduPlatform | Personal Project 2024

HTML5 · CSS3 · JavaScript

- Built a responsive educational platform featuring course listings, a blog, and multi-page navigation

EDUCATION

B.Sc. in Software Engineering | University of Lattakia, Syria 2022 - 2026
